

Hospital@Home

Launching in Spring 2026, Abicare are delighted to be partnering with HEALIX HEALTH to offer a bespoke HOSPITAL@HOME care provision.

Designed to ease the burden on the NHS, and increase patient choice, we will be working in close collaboration with local hospitals to discharge you, or your loved ones early. We provide tailor made care packages including specialist nursing, physiotherapy and allied clinical care services delivered from the comfort and safety of the place they call home. It is a hospital provision delivered in the home, but with the same dedication to care.

Hospital@Home is flexible to the needs of the patient – we can step up care when needed, alter elements within the care, or even take a break.

It's Hospital support but not as you know it, with you, the patient, at the heart of everything we do.
